## Projects

### CONTACT MANAGEMENT APP (OnGoing)

This is a contact management application, an application that allows users to easily locate and save contact information, including names, telephone numbers and addresses.

### WEATHER APP (API)

In this weather app, you can get the weather details of a particular city by entering the city name, if you entered an invalid city name then there is shown an error message.

### WIKIPEDIA CLONE (API)

A Wikipedia clone, also called a Wikipedia mirror site, is a web site that uses information derived wholly or in large part from Wikipedia.

### TO-DO LIST USING REACT JS

To-Do List project is an application specially built to keep track of errands or tasks that need to be done. This application will be like a task keeper where the user would be able to enter the tasks that they need to do. Once they are done with their tasks they can also remove them from the list.

### PORTFOLIO

The Complete Customizable Software Developer Portfolio Template which lets you showcase your work and provides each and every detail about you as Software Developer.
